Marmon Electrical Announces Combined Global Oil and Gas Portfolio

The Woodlands, TX – The companies of RSCC, Dekoron, Dekoron Unitherm, and Kerite, all part of Marmon Electrical, are aligning their market expertise and manufacturing capabilities to establish an integrated product offering to better serve the global oil and gas industry. This market-focused portfolio includes the industry-recognized brands of VITALink®, Perma-TEC®, Exane®, DekaFlame®, and Gardex®.

Luis Adame, Vice President & General Manager of the Oil & Gas group, is excited to announce this combined portfolio. “By bringing together the strengths of our sister facilities, we have a unique opportunity to provide our customers with a complete range of high-quality solutions, designed to withstand the harshest environments required within this market. Whether for control, power, circuit integrity, instrumentation applications or steam/gas/fluid transport (tubing), these products are manufactured to survive exposure to hazards such as: chemicals, extreme temperatures, radiation, moisture, corrosion and fire. Our unified sales teams now have the ability to offer solutions for any application from upstream to downstream operations, further establishing us as a leader within the oil and gas market.”
